DETAILED ACTION

1. Receipt is acknowledged of the preliminary amendment filed August 7, 2001 and the information disclosure statement filed January 18, 2002. Claims 2-5 and 8-11 have been amended. Claims 1-13 are pending.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

3. The use of the trademarks in the examples has been noted in this application. They should be capitalized wherever they appear and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner that might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 3, 4, 6 and 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1617

6. Claim 1 is indefinite because it is unclear if the composition contains between about 6 and 20% of a polyhydric alcohol or more than 20% of a polyhydric alcohol.

7. Claim 1 is indefinite because it recites a concentration range but does not provide units.

8. Claims 3, 4 and 6 are indefinite because they recite the word "derivatives".

Neither the claims nor the specification provides a clear and concise definition of the derivatives Applicant intends to claim. The metes and bounds of the claims cannot be determined.

9. Claim 11 is indefinite because it is unclear what Applicant intends by a cosmetic method of treatment.

10. Claims 12 and 13 provide for the use of a cation containing polymer and a composition, respectively, but, since the claims do not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 12 and 13 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd. App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

11. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

12. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by WO 94/03150 (150).

WO '150 is directed to compositions intended for washing the human body (abstract). The compositions contain a cationic polymer (abstract) and a polyol such as glycerol (page 8, lines 30-32). For a composition containing glycerol and hydroxypropyltrimonium chloride in concentrations encompassed by the instant claims, see the examples in Table 1 at page 13. The compositions in Table 1 do not contain an anionic, zwitterionic or amphoteric surfactant. The intention of the composition for use in washing the human body implies applying the composition to the skin.

Claim Rejections - 35 USC § 103

13. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

14. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 1617

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

15. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 94/03150 (150)

WO '150 teaches all the limitations of the claims as stated in the 35 U.S.C. 102(b) rejection above. It does not explicitly teach application of the composition to the skin. The compositions are intended for washing the human body.

It would have been obvious to one of ordinary skill in the art at the time of the invention to apply the compositions of WO '150 to the skin with the reasonable expectation of delivering oil components to the skin.
